+91 755 913 4231 | kaledurgesh62@gmail.com | linkedin.com/in/durgesh-kale-bb9154289 | github.com/Durgeshkale

Software engineering student with hands-on experience in Python and C++, applied machine learning (PyTorch, scikit-learn, OpenCV), and full-stack web development (React, Node.js, SQL/NoSQL). Strong DSA foundation with 150+ problems solved.

EDUCATION

Government College of Engineering, Nagpur, Maharashtra, India

Bachelor of Technology in Computer Science and Engineering | Expected 2027 | CGPA: 7.71/10

- Coursework focus: Artificial Intelligence, Data Structures & Algorithms, Operating Systems, Computer Networks, System Design.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Solidity, SQL, HTML/CSS

Libraries & Tools: PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, Git, Docker, Web3.js

Frameworks & Databases: React, Node.js, Express, Supabase, SQL/NoSQL

Core Fundamentals: Data Structures & Algorithms, System Design, Linux Administration, Applied Mathematics

PROJECTS

AI-Powered Aerial Surveillance System | Python, YOLOv8, PyTorch, OpenCV, Hugging Face Spaces

- Built a real-time object-detection pipeline on the VisDrone2019-DET dataset (10,209 images, 2.6M+ annotated bounding boxes), achieving 68.21% mAP@50, 78.65% precision, and 60.34% recall for aerial threat identification.
- Designed an OpenCV image-enhancement pipeline to reduce sensor noise, improving inference reliability under variable environmental conditions.
- Deployed a production interface on Hugging Face Spaces for public testing and live evaluation.

Surajya — Decentralized Governance Platform | Blockchain, React, Web3.js, Smart Contracts

- Co-built (2-person team) gas-optimized, unit-tested smart contracts to process municipal grievances immutably; placed 4th of 150+ teams at Hack-ON Hackathon (Feb 2026).
- Integrated Web3 provider connectivity into a React dashboard for secure, decentralized user authentication.
- Engineered custom access-control modifiers to eliminate admin manipulation vectors and enforce tamper-proof execution flows.

WORK EXPERIENCE

Google Developer Groups on Campus (GDGC), GCOEN — Nagpur, India

Marketing Associate | Aug 2024 – Jun 2025

- Led a 7-member marketing subteam within a 30+ member club, driving outreach and promotion across 10+ tech events during the tenure, including hackathons, sponsor seminars, and alumni webinars.
- Represented GDGC in sponsorship meetings, helping secure sponsor support for club-run events.
- Co-organized Hack-ON, a hackathon drawing 150+ competing teams, handling planning and on-ground coordination.

ACHIEVEMENTS & COMPETITIONS

- Placed 4th of 150+ teams at Hack-ON Hackathon (Feb 2026) with Surajya, a decentralized governance platform.
- Solved 150+ algorithmic problems on LeetCode, strengthening DSA and problem-solving fundamentals.
- Built functional prototypes end-to-end across multiple hackathons under compressed development timelines.
